CURRENT POSITION:

Postdoctoral Fellow 2019-
*Key Laboratory of Quark & Lepton Physics (MOE) and Institute of Particle Physics (IOPP),
Central China Normal University, China*
*Research on study of QCD Critical Point search and onset of Phase transition in the STAR
Collaboration at Brookhaven National Laboratory (BNL), New York.*

EDUCATION:

- **PhD (High Energy Nuclear Physics)** 2013-2019
University: Variable Energy Cyclotron Centre, Homi Bhabha National Institute, Kolkata
Thesis title: “ [Study of conserved quantities and their correlations in the RHIC Beam Energy Scan Program.](#)”
Thesis topics: Study the properties of quark-gluon-plasma to hadronic phase transition through off-diagonal cumulant analysis of net-particle multiplicity distribution in the STAR experiment at BNL, New York.
Thesis advisor: [Prof. Tapan Kumar Nayak](#)
- **Master of Science (Physics) (1st class)** 2011-2013
University: National Institute of Technology, Durgapur
Subject: [Academic Courses](#)
Specialization course: Optoelectronics
Final semester project: Short review in black hole astronomy
Project advisor: [Dr. Soumen Basu](#)
- **Bachelor of Science (1st class)** 2008-2011
University: The University of Burdwan, Katwa College

Subject: Physics (Honours) [Academic Courses](#)

Chemistry(general): [Academic Courses](#)

Mathematics: [Academic Courses](#)

- **Higher Secondary (+2)** (1st class) 2006-2008
Katwa Bharati Bhavan High School
Board: West Bengal Council of Higher Secondary Education
- **Secondary (10th)** (1st class) 2006
Katwa Janakilal Siksha Sadan High School
Board: West Bengal Board of Secondary Education

RESEARCH AREAS:

- Experimental Nuclear and High Energy Physics.
- Search and studies of Quark Gluon Plasma (QGP), probing the Critical Point

CURRENT FIELD OF RESEARCH:

Presently I am working in the field of Quark Gluon Plasma (QGP) phase of nuclear matter, as it relates to fundamental questions in high energy nuclear physics as well as makes a connection to the Early Universe and involves many branches of physics. My focus is on study of particle number fluctuations and correlations among different observables in the system created in Relativistic Heavy Ion collisions as it can help to map the QCD phase diagram. I am analysing the data from the STAR experiment at RHIC to have a precision measurement of the freeze-out parameters and to obtain signals for the search of QCD critical point.

RESEARCH EXPERIENCE:

Postdoctoral Fellow

2019-

I am currently a postdoctoral fellow working with Prof. Xiaofeng Luo in the College of Physical Science and Technology at Central China Normal University, China. My research focuses on Study of QCD phase diagram in the Beam Energy Scan program at Relativistic Heavy Ion Collider (RHIC) for studying the properties and freeze-out parameters of QGP to hadrons phase transitions in heavy-ion collisions experiments.

Graduate Student

2014-2019

I pursued my PhD work under the guidance of Prof. Tapan Kumar Nayak in the STAR experiment at the Relativistic Heavy Ion Collider (RHIC) at Brookhaven National Laboratory (BNL), USA. The aim of this experiment is to address fundamental questions related to the origin of the Universe and the formation of matter. During the course of my PhD, I have been primarily involved in:

- *Study of correlation between identified particles in Heavy Ion Collision using data taken by the Time Projection Chamber (TPC) and forward Time Of Flight (TOF) in the STAR experiment at BNL.*
- *Using the event generator, like Ultra-relativistic Quantum Molecular Dynamics (UrQMD) and A Multi-Phase Transport (AMPT), and Hadron Resonance Gas (HRG) to simulate and mimic the heavy ion collision experiment*
- *Regularly presented the data analysis result in STAR collaboration physics working group.*

PUBLICATIONS:

Journal Papers:

List of publications as first/principal author

1. “Diagonal and off-diagonal susceptibilities of conserved quantities in relativistic heavy-ion collisions”, *Arghya Chatterjee, Sandeep Chatterjee, Tapan K. Nayak, Nihar Ranjan Sahoo*, [J. Phys. G: Nucl. Part. Phys. **43**, 125103 \(2016\)](#)
2. “Isothermal compressibility of hadronic matter formed in relativistic nuclear collisions”, *Maitreyee Mukherjee, Sumit Basu, Arghya Chatterjee, Sandeep Chatterjee, Souvik Priyam Adhya, Sanchari Thakur, Tapan K. Nayak*, [Physics Letters B. **784**, 1-5 \(2018\)](#)
3. “Collision energy dependence of second-order off-diagonal and diagonal cumulants of net-charge, net-proton and net-kaon multiplicity distributions in Au+Au collisions”, *J. Adam, A. Chatterjee, et al. (STAR Collaboration)*, [Phys. Rev. C **100**, 014902 \(2019\)](#)
4. “Effect of centrality selection on higher-order cumulants of net-proton multiplicity distributions in relativistic heavy-ion collisions”, *Arghya Chatterjee, Yu Zhang, Jingdong Zeng, Nihar R. Sahoo, Xiaofeng Luo*, [Phys. Rev. C **101**, 034902 \(2020\)](#)
5. “Effects of centrality fluctuation and deuteron formation on proton number cumulant in Au+Au collisions at 3 GeV from JAM model”, *Arghya Chatterjee, Yu Zhang, Hui Liu, Ruiqin Wang, Shu He, Xiaofeng Luo*, [Chinese Phys. C **accepted** \(2021\)](#)

TALKS AND POSTERS AT CONFERENCES

6 oral/plenary presentations and 3 posters.

International conferences:

1. “Off-diagonal cumulants of net-particle multiplicity distributions in Au+Au collisions and effect of centrality selection on net-proton cumulant analysis” at *Workshop on the QCD Phase Structure at High Baryon Density Region*, Wuhan, China, November 2019 (Oral Talk)
2. “The STAR measurements on off-diagonal cumulants of net-particle multiplicity distributions in Au+Au collisions at $\sqrt{s_{NN}} = 7.7\text{-}200$ GeV” at *Quark Matter 2019*, Wuhan, China, November 2019 (Poster)
3. “Second-order Off-diagonal cumulants of net-proton, net-kaon and net-charge multiplicity distributions at RHIC ” at *QPT 2019*, Enshi, China, August 2019 (Oral Talk)
4. “Off-diagonal cumulants of net-charge, net-proton and net-kaon multiplicity distributions in Au+Au collisions at $\sqrt{s_{NN}} = 7.7\text{-}200$ GeV” at *CPOD 2018*, Corfu, Greece, September 2018 (**Plenary Talk**)
5. “Study of off-diagonal cumulants of net-charge, net-proton and net-kaon multiplicity distributions in Au+Au collisions at STAR” *RHIC & AGS Users meeting 2018*, BNL, USA, June 2018 (**Invited Talk**)
6. “Off-diagonal Cumulants of Net-charge, Net-proton, and Net-kaon Multiplicity Distributions in Au+Au collisions at STAR” at *Quark Matter 2018*, Venezia, Italy, May 2018 (Poster)

National conferences:

7. “Susceptibilities of conserved quantities in relativistic heavy-ion collisions at RHIC” at *61st DAE-BRNS Symposium on Nuclear Physics*, SINP, Kolkata, 5-9 December 2016 (Oral Talk)
8. “Study of cross correlations susceptibilities of conserved charge fluctuation at RHIC energies” at *CNT QGP Meet 2015*, VECC, Kolkata, 16-20 November 2015 (Oral Talk)
9. “Study of Event-by-Event correlations of charge, baryon number and strangeness in heavy-ion collisions” at *60th DAE-BRNS Symp. on Nucl. Phys.*, SSIHL, Bangalore, 7-11 December 2015 (Poster)

TECHNICAL SKILLS:

- Programming Languages: Python, C++, html
- Detector experience

- Simulation packages: GEANT, event generators for HIC (UrQMD, HIJING, AMPT, JAM)
- Software: ROOT, Mathematica
- Operating Systems: Unix/Linux, Windows, Macintosh

ACADEMIC ACTIVITIES:

- JEST (Joint Entrance Screening Test) 2013
